

Lepton::ParsedExpression  
::optimize

Lepton::ParsedExpression  
::renameVariables

Lepton::ParsedExpression  
::ParsedExpression

```
graph LR; A[Lepton::ParsedExpression::optimize] --> C[Lepton::ParsedExpression::ParsedExpression]; B[Lepton::ParsedExpression::renameVariables] --> C;
```

The diagram illustrates a control flow or dependency. Two source functions, 'Lepton::ParsedExpression::optimize' and 'Lepton::ParsedExpression::renameVariables', are shown on the left. Arrows from both point to a single target box on the right, 'Lepton::ParsedExpression::ParsedExpression'. The target box is shaded gray, while the source boxes are white.
